

Noggin2 Cheatsheet

Obsidian + LLM second-brain system. No plugins. No cloud. Plain markdown.

Folder Layout

_inbox.md	friction-free capture
_meta/	protocol docs, decisions log
_templates/	daily note template
_compiled/	auto-generated intake logs
_digests/	weekly digests
_maps/	Maps of Content (hand-curated)
_projects/	project tracker, Claude Code briefs
_rabbitholes/	deep-dive research notes
Programming/	tools/repos by language (#code)
YYYY-MM-DD topic.md	daily notes at vault root

Tags Claude Acts On

#askclaude	answer via footnote (simple) or new note + wikilink (complex)
#link-me	linking pass: find related notes, add bidirectional wikilinks
#todo	compiled to _compiled/todos.md as checkbox list
#inspo	section captured to _compiled/inspiration.md (domain tag filters)
#seed	creative fragment, compiled per-topic to Topic/seeds.md
#claudecode	build idea: creates _projects/<slug>/brief.md
#title-me	fetch page title for raw URL, replace with titled link
#rabbithole	deep-dive research note in _rabbitholes/
#tobuy	wishlist item, compiled to _compiled/tobuy.md
#shopping	recurring shopping, compiled to _compiled/shopping.md
#plex	query Plex library via plex-usher-mcp + RT/IMDB/Metacritic via usher-tools
#code	repo capture: scrape metadata, file to Programming/{Lang}.md
#spot	query Spotify via spotify-usher-mcp (search, art, recently played)
#dailymusic	line compiled to _compiled/music.md
#dailyfilm	line compiled to _compiled/film.md
#dailyquote	line compiled to _compiled/quotes.md
#dailyart	line compiled to _compiled/art.md
#dailymeme	line compiled to _compiled/memes.md
#dailygame	line compiled to _compiled/games.md

#claudespeaks (Claude-owned): daily thought in ## claudespeaks section. **Never touches:** #deepdive, #followup, #Brightidea, #todo-done, domain tags.

Footnote Prefixes

[^c-N]	Claude reply to #askclaude
[^src-slug]	source/provenance citation
[^YYYY-MM-DD-slug]	future-you annotating past-you
[^dig-N]	digression pulled out of main text
[^def-word]	glossary / etymology drop
[^note-slug]	general side note

Workflows

Ask a question	#askclaude what is the Circle Machine
Drop inspiration	#inspo #Design tunnel books / accordion 3d [url]
Creative seed	#seed #Literature A snail baby lives its life...
Capture todo	#todo build a compiler that mimics the genome
Title a URL	#title-me https://example.com/article
Wishlist	#tobuy Chinese Pickling Jar: Water Moat Seal
Shopping	#shopping olive oil, coffee filters
Rabbithole	#rabbithole #Hardware how CRT electron guns work
Project brief	#claudecode build an MCP server wrapping discogs API
Capture repo	#code https://github.com/user/cool-repo
Spotify lookup	#dailymusic Artist - #spot track name or query
Plex query	#plex list my unwatched anime
Promote	ask Claude: "promote the seiko stuff into Design/"
Linking pass	#link-me (drop in any note)
Quick capture	type in _inbox.md, hints: -> daily, -> topic, -> defer

Rules

- Today's daily note is never renamed. Topic suffix added next day or later.
- Daily notes are never rewritten. Claude edits: footnotes, #claudespeaks, promoted footers only.
- Promotion to topic folders is always user-requested, never automatic.
- Compiled files are caches. Regenerate from scratch. Never hand-edit (except todo checkboxes).
- #daily* tags pair with base tags, not replace them. Both stay.
- Scheduled runs are grep-first. Zero work = one grep + one log line.
- Never edit a past line. Add a dated footnote instead.
- No community plugins, no cloud LLM ingest. Obsidian core + Sync + local assistant.

Key Files

_meta/SYSTEM.md	full system doc (shareable)
_meta/README.md	session-start, tag conventions
_meta/decisions.md	why the rules are the way they are
_meta/footnotes.md	footnote annotation protocol
_meta/compile.md	intake compilation rules
_meta/voice.md	user writing style observations
_meta/future.md	deferred ideas, not yet built
_meta/tag-incubator.md	unrecognized tag log, promotion candidates
_meta/claudespeaks.md	daily thought protocol
_meta/spot.md	Spotify query protocol
_meta/plex.md	Plex library query protocol
_meta/code.md	code/repo capture protocol
_projects/_index.md	project dashboard (compiled)

Just capture. Drop it in a daily note or _inbox.md with whatever tags feel right. File-friction is the enemy of a second brain.
