

Noggin2 Cheatsheet

Obsidian + LLM second-brain system. No plugins. No cloud. Plain markdown. Tags are the interface.

Folder Layout

Path	Purpose
_inbox.md	Friction-free capture buffer
_meta/	Protocol docs, assistant memory, decisions log
_templates/	Daily note template
_compiled/	Auto-generated intake logs and todo list
_digests/	Weekly digests (YYYY-Wxx.md)
_maps/	Maps of Content (hand-curated hubs)
_projects/	Project tracker and Claude Code briefs
_rabbitholes/	Deep-dive research notes
Programming/	Tools/repos by language (auto-filed by #code)
Movies/	Letterboxd, anime, Plex exports
Music Knowledge/	Playlists, theory, instruments
Design/	Typography, logo, print, layout
Cartography_Maps/	Map fonts, cartographic type

Hide from graph: _meta/ _compiled/ _digests/ _templates/ _rabbitholes/ _inbox.md

Daily Notes

One per day. Today is always bare YYYY-MM-DD.md. After the day rolls, Claude adds a 2-4 word topic suffix (most memorable thing, not most important). Template sections: intake tags, **claude**speaks, projects, links, inspo, ideas, dump. Sections are zones, not walls. If in a hurry, throw everything in dump.

Append-only. Claude's edits: footnote markers, #claude speaks block, > promoted: footers. Nothing else.

Tags Claude Acts On

Tag	What happens
#askclaude	Answer via footnote. Simple: inline definition. Complex: own note + wikilink in footnote
#link-me	Linking pass: find related notes, add wikilinks, make bidirectional
#todo	Compiled to _compiled/todos.md as checkbox list with stable block refs
#inspo	Section captured to _compiled/inspiration.md. Co-occurring domain tag for filtering
#seed	Creative fragment compiled per-topic to Topic/seeds.md. Your ideas, not found links
#claudecode	Build idea. Creates _projects/<slug>/brief.md with architecture + session prompt
#title-me	Fetch page title for raw URL, replace with [Title](url). Tag disappears on success
#rabbithole	Deep-dive research. Creates thorough note in _rabbitholes/. Verbose output is the point
#tobuy	Wishlist item. Compiled to _compiled/tobuy.md. Stable hash checkboxes
#shopping	Recurring purchases. Compiled to _compiled/shopping.md. Weekly rolling list
#plex	Query Plex library via natural language. Metadata, posters, exports. Requires plex-usher-mcp
#code	Repo capture. Scrape GitHub metadata, file to Programming/{Language}.md. Title the link
#daily*	dailymusic, dailyfilm, dailyquote, dailyart. Line compiled to _compiled/*.md

Tags Claude Owns

#claudespeaks - Claude's daily thought in ## c laudespeaks. Music recs, ideas, questions, connections to recent vault activity. One block per day, one focus, no preamble. Written during scheduled run or session start. Never filler.

Tags Claude Never Touches

#deepdive #followup #Brightidea #todo-done and all domain tags (#Music #Art #Design #Hardware #Literature etc). Claude reads them for context but never processes independently.

Footnote Prefixes

Prefix	Purpose	Example
[^c-N]	Claude reply to #askclaude	[^c-1]
[^src-slug]	Source citation	[^src-wikipedia]
[^YYYY-MM-DD-slug]	Future-you annotating past-you	[^2026-04-12-wrong]
[^dig-N]	Digression you pulled out of	[^dig-1]
[^def-word]	Glossary / etymology drop	[^def-qid]
[^note-slug]	General side note	[^note-fuzz-pedals]

Never edit a past line. Add a dated footnote instead. The archaeology matters.

Workflows

Ask a question

#askclaude what is that Raymond Scott sequencer with rotating contacts

Footnote with answer. Big answers get their own note + wikilink.

Drop inspiration

#inspo #Design tunnel books / accordion style 3d

https://rarebooks.uflib.ufl.edu/...

Section captured to _compiled/inspiration.md. Filter by domain tag.

Drop a creative seed

#seed #Literature A snail baby lives its life...

Compiled per-topic to Topic/seeds.md. Seeds = yours. Inspo = found.

Capture a todo

#todo build a compiler that mimics the genome

Checkbox in _compiled/todos.md with stable hash. Check box or add #todo-done.

Title a raw URL

#title-me https://www.example.com/article

Replaced with [Page Title](url). Tag disappears on success.

Buy/shop lists

#tobuy Chinese pickling jar

#shopping olive oil, coffee

#tobuy for wishlist, #shopping for recurring. Both compile to _compiled/ lists.

Go down a rabbit hole

#rabbithole #Hardware how CRT electron guns work

Creates thorough research note in _rabbitholes/. Verbose output.

Kick off a project

#claudecode MCP server wrapping discogs API

Creates _projects/slug/brief.md with arch, plan, and Claude Code prompt.

Capture a code tool

```
#code https://github.com/user/repo
```

Scrapes metadata, files to Programming/{Language}.md, titles the link.

Query Plex

```
#plex what actors were in The Thing?
```

Searches library, returns metadata/posters via footnote. Needs plex-usher-mcp.

Promote content

```
Ask: "promote the seiko stuff into Design/"
```

Creates/appends target note. Adds > promoted: footer. Never automatic.

Request linking pass

```
#link-me
```

Finds related notes, adds wikilinks, bidirectional. Renames tag to #link-me-done.

Quick capture

```
Open _inbox.md, type one line, save
```

Routed next session: -> daily, -> Folder, -> askclaude, -> defer.

Rules

1. Today's daily note is never renamed. Topic suffix added next day.
2. Daily notes are never rewritten. Claude's edits: footnotes, #claudespeaks, > promoted: footers.
3. Promotion to topic folders is always user-requested, never automatic.
4. Compiled files are caches. Regenerate from scratch. Never hand-edit (except todo checkbox state).
5. #daily* tags paired with base tags, not replacing them. Both stay.
6. Scheduled runs are grep-first. Zero tags = skip to #claudespeaks. No wasted tokens.
7. Never rename-and-revert a file in the same session (virtiofs cache desync risk).
8. Screenshots can be OCR'd. Handwritten content stays unless explicitly told otherwise.
9. Never edit a past line to correct it. Add a dated footnote instead.
10. No community plugins, no cloud LLM ingest, no automation platforms. Obsidian core + Sync + assistant.

Key Files

File	What it is
_meta/SYSTEM.md	Full system doc (shareable)
_meta/README.md	Session-start checklist, tag conventions
_meta/decisions.md	Design decisions log (append-only)
_meta/footnotes.md	Footnote annotation protocol
_meta/askclaude/README.md	Askclaude tag protocol
_meta/voice.md	Writing style observations
_meta/compile.md	Intake compilation rules
_meta/plex.md	Plex library query protocol
_meta/code.md	Code/repo capture protocol
_meta/claudespeaks.md	Daily thought protocol
_meta/projects.md	Project index protocol
_projects/_index.md	Project dashboard (compiled)

Just capture. Drop it in a daily note or _inbox.md with whatever tags feel right. File-friction is the enemy of a second brain.
