

Noggin2 Cheatsheet

Obsidian + LLM second-brain system. No community plugins. Plain markdown. Tags are the interface.

Folder Layout

Folder	Purpose
_inbox.md	Friction-free capture buffer
_meta/	Protocol docs, assistant memory, decisions log
_templates/	Daily note template
_compiled/	Auto-generated intake logs and todo list
_digests/	Weekly digests (YYYY-Wxx.md)
_maps/	Maps of Content (hand-curated hubs)
_projects/	Project tracker and Claude Code briefs
_rabbitholes/	Deep-dive research notes
YYYY-MM-DD topic.md	Daily notes at vault root
Topic folders/	Music Knowledge, Movies, Design, Hardware, Programming, etc.

Tags Claude Acts On

Tag	What Happens
#askclaude	Answer via footnote. Simple = inline. Complex = own note + short footnote
#link-me	Linking pass: find related notes, add wikilinks, make bidirectional
#todo	Compiled to _compiled/todos.md as checkbox list. Stable hash IDs
#inspo	Section captured to _compiled/inspiration.md. Pair with domain tag
#seed	Creative fragments compiled per-topic to Topic/seeds.md
#claudecode	Build idea. Creates project brief at _projects/<slug>/brief.md
#title-me	Fetch page title for raw URL, replace with titled link. Tag disappears
#rabbithole	Deep-dive research. Creates thorough note in _rabbitholes/
#tobuy	Wishlist (unique items). Compiled to _compiled/tobuy.md
#shopping	Recurring purchases. Compiled to _compiled/shopping.md
#plex	Query Plex library. Search, metadata, posters, exports. Requires plex-usher-mcp
#code	Repo capture. With URL: scrape metadata, file to Programming/{Lang}.md
#spot	Query Spotify. Resolve tracks/albums, fetch art. Composes with #dailymusic. Requires spotify-usher-mcp
#daily*	#dailymusic, #dailyfilm, #dailyquote, #dailyart. Line compiled to _compiled/*.md

#claudespeaks (Claude owns): Daily thought in ## claudespeaks. One block per day. **Never touches:** #deepdive, #followup, #Brightidea, #todo-done, domain tags

Footnote Prefixes

Prefix	Purpose	Example
[^c-N]	Claude reply to #askclaude	[^c-1]
[^src-slug]	Source/provenance citation	[^src-wikipedia]
[^YYYY-MM-DD-slug]	Future-you annotating past-you	[^2026-04-12-wrong]
[^dig-N]	Digression capture	[^dig-1]
[^def-word]	Glossary/etymology	[^def-qid]
[^note-slug]	General side note	[^note-fuzz-pedals]

Workflows

Ask a question:
#askclaude what is the Circle Machine
Appends [^c-1], writes answer in ## footnotes.

Drop inspiration:
#inspo #Design tunnel books / accordion style 3d
Captured to _compiled/inspiration.md. Filter by domain tag.

Drop a creative seed:
#seed #Literature A snail baby lives its life...
Compiled per-topic to Literature/seeds.md.

Capture a todo:
#todo build a compiler that mimics the genome
Stable checkbox in _compiled/todos.md. Check box or add #todo-done.

Title a raw URL:
#title-me https://example.com/cool-page
Becomes [Page Title](url). Tag disappears. Surrounding text preserved.

Auto-fill music from Spotify:
#dailymusic Tim Exile - #spot what album was I listening to
Resolves via Spotify API. Rewrites with Spotify link. #spot disappears.

Query Plex library:

```
#plex pull the movie poster for Akira
Searches Plex, pulls metadata/posters, writes to footnote.
```

Capture a code repo:

```
#code https://github.com/user/repo
Scrapes metadata, files to Programming/{Language}.md. Tag disappears.
```

Go down a rabbit hole:

```
#rabbit hole #Hardware how CRT electron guns work
Thorough research note in _rabbit holes/ with sources and wikilinks.
```

Kick off a project:

```
#claudecode build an MCP server for discogs
Creates _projects//brief.md with architecture and session prompt.
```

Promote to topic folder:

```
Ask: "promote the seiko stuff into Design/"
Non-destructive. > promoted: [[Target]] footer. Never automatic.
```

Quick capture:

```
_inbox.md, one line, save. Routed by hints (-> daily, -> Topic, -> askclaude).
```

Rules

- 1. Today's daily note is never renamed. Topic suffix added next day or later.
- 2. Daily notes are never rewritten. Claude edits: footnotes, #claudespeaks, promoted footers only.
- 3. Promotion to topic folders is always user-requested, never automatic.
- 4. Compiled files are caches. Regenerate from scratch. Never hand-edit (except checkbox state).
- 5. #daily* tags paired with base tags, not replacing them.
- 6. Scheduled runs are grep-first: zero work = one grep and one log line.
- 7. Never edit a past line. Add a dated footnote instead.
- 8. No community plugins, no cloud LLM ingest. Obsidian core + Sync + local assistant.

Key Files

File	What It Is
_meta/README.md	Session-start checklist, tag conventions
_meta/SYSTEM.md	Full system overview (shareable)
_meta/decisions.md	Why the rules are the way they are
_meta/askclaude/README.md	Askclaude tag protocol
_meta/footnotes.md	Footnote annotation protocol
_meta/plex.md	Plex library query protocol
_meta/spot.md	Spotify query protocol
_meta/code.md	Code/repo capture protocol
_meta/claudespeaks.md	Daily thought protocol
_meta/voice.md	Your writing style observations
_meta/future.md	Deferred ideas, not yet built
_projects/_index.md	Project dashboard (compiled)
CHEATSHEET.md	This document (markdown version)
